Introduction

The 1999 edition of the Annual Summary of Vital Statistics is a summary of data compiled from vital event records for the 1999 calendar year. The content of this report includes summaries of vital events such as live births, fetal deaths, abortions, deaths, marriages, and marriage dissolutions documented by certificates and reports filed with the Office of Vital Statistics, Center for Health and Environmental Statistics. Please note that the 1999 edition of the Annual Summary contains a county table that assesses adequacy of prenatal care, known as the Adequacy of Prenatal Care Utilization (APNCU) Index. Also noteworthy, causes of death for 1999 are classified using the International Classification of Disease, 10th Revision (ICD-10). Prior to 1999, Kansas used ICD-9 to report mortality statistics. Kansas is now calculating age-adjusted death rates using the 2000 U.S. standard population. This will eliminate confusion and misunderstanding created by the use of various population standards. For more information on these topics, please see the Technical Notes.

This document provides its users with an overview of the events contributing to the health status of Kansans. The facts contained in this report are essential for effective health policy decisions and program planning. It is designed to provide governmental agencies, businesses, industries, and citizens with information on vital statistics in Kansas.

Comments concerning the format or content of this report are welcomed. The Annual Summary of Vital Statistics is a **summary** of the health data collected by the State of Kansas on vital events.
